Click on “Menu” to view the various options available.

Profile

This is one of the options available to create market watch.

Market Watch is used to check out the market related data of the scrip's on a real time basis

- Information like the Last trade price, Open Price, High Price, Low Price, Best Buy/Sell Price, Best Buy/Sell Qty, Percentage Change, etc. can be viewed in a market watch.
- The user has the flexibility to decide the fields as well as their order in which they should appear on his market watch.
- The user can create different groups (Set of scrip's) as per his requirement and can Toggle between different groups by clicking on the group name that appears on the Extreme left hand side of the market watch.

- Click on Profile to create market watch
- Enter the profile name in profile
- Check the default option if you want to set the selected profile as default one
- Click Lookup button to add respective scrip in the new profile.

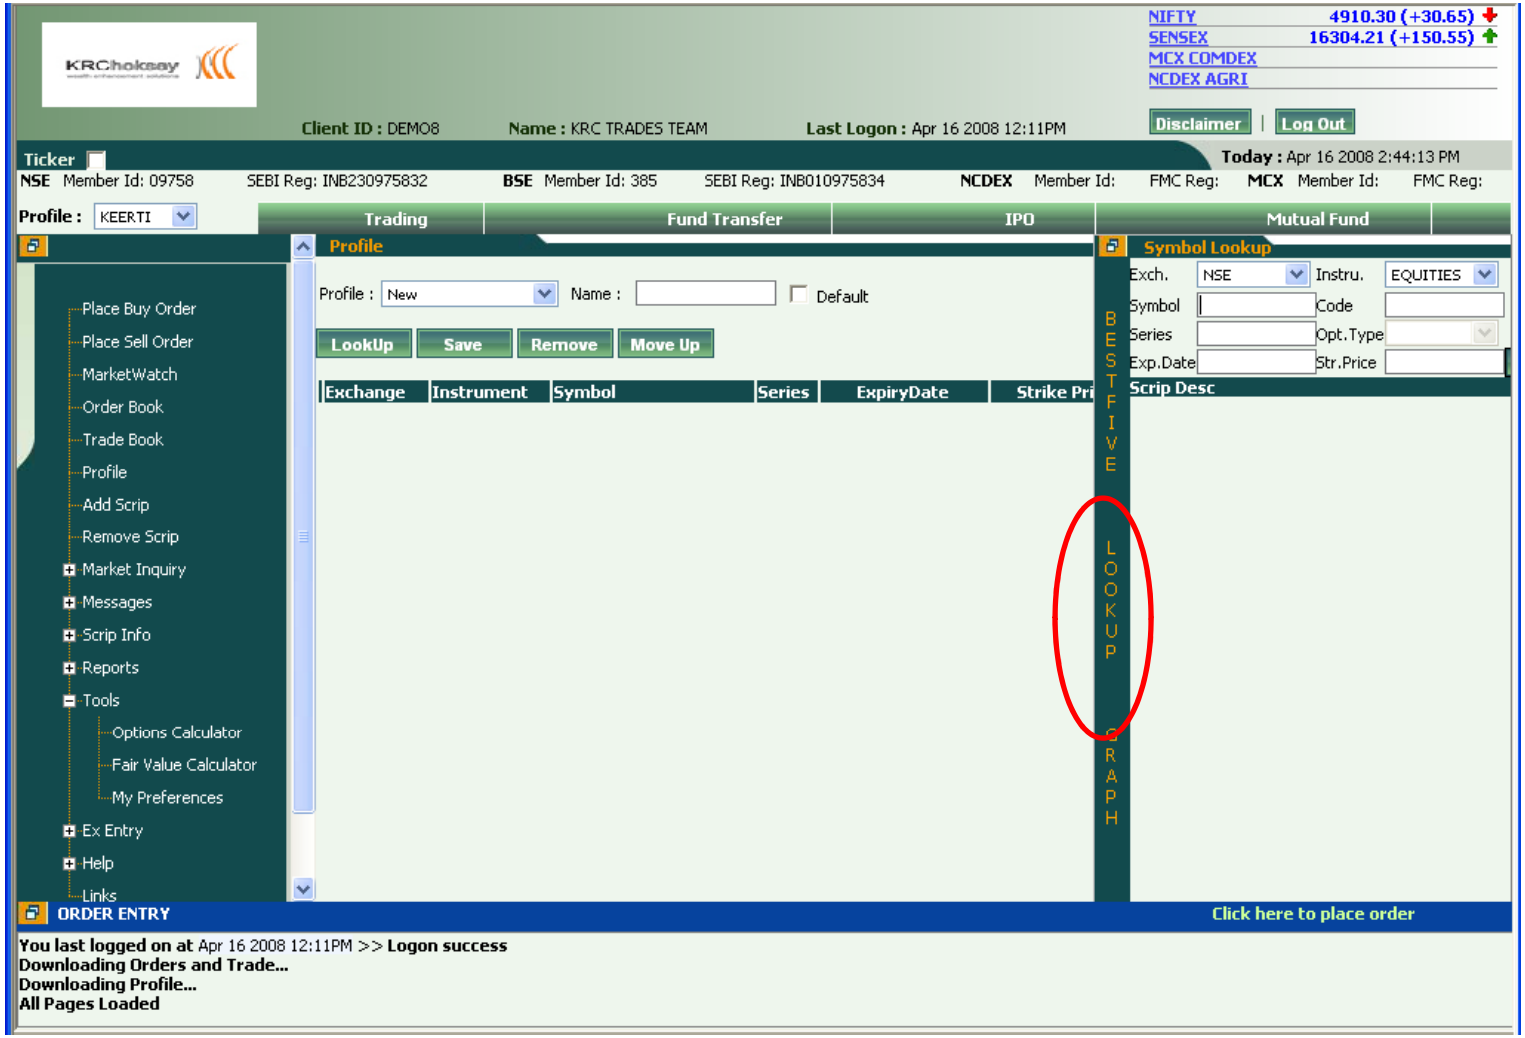
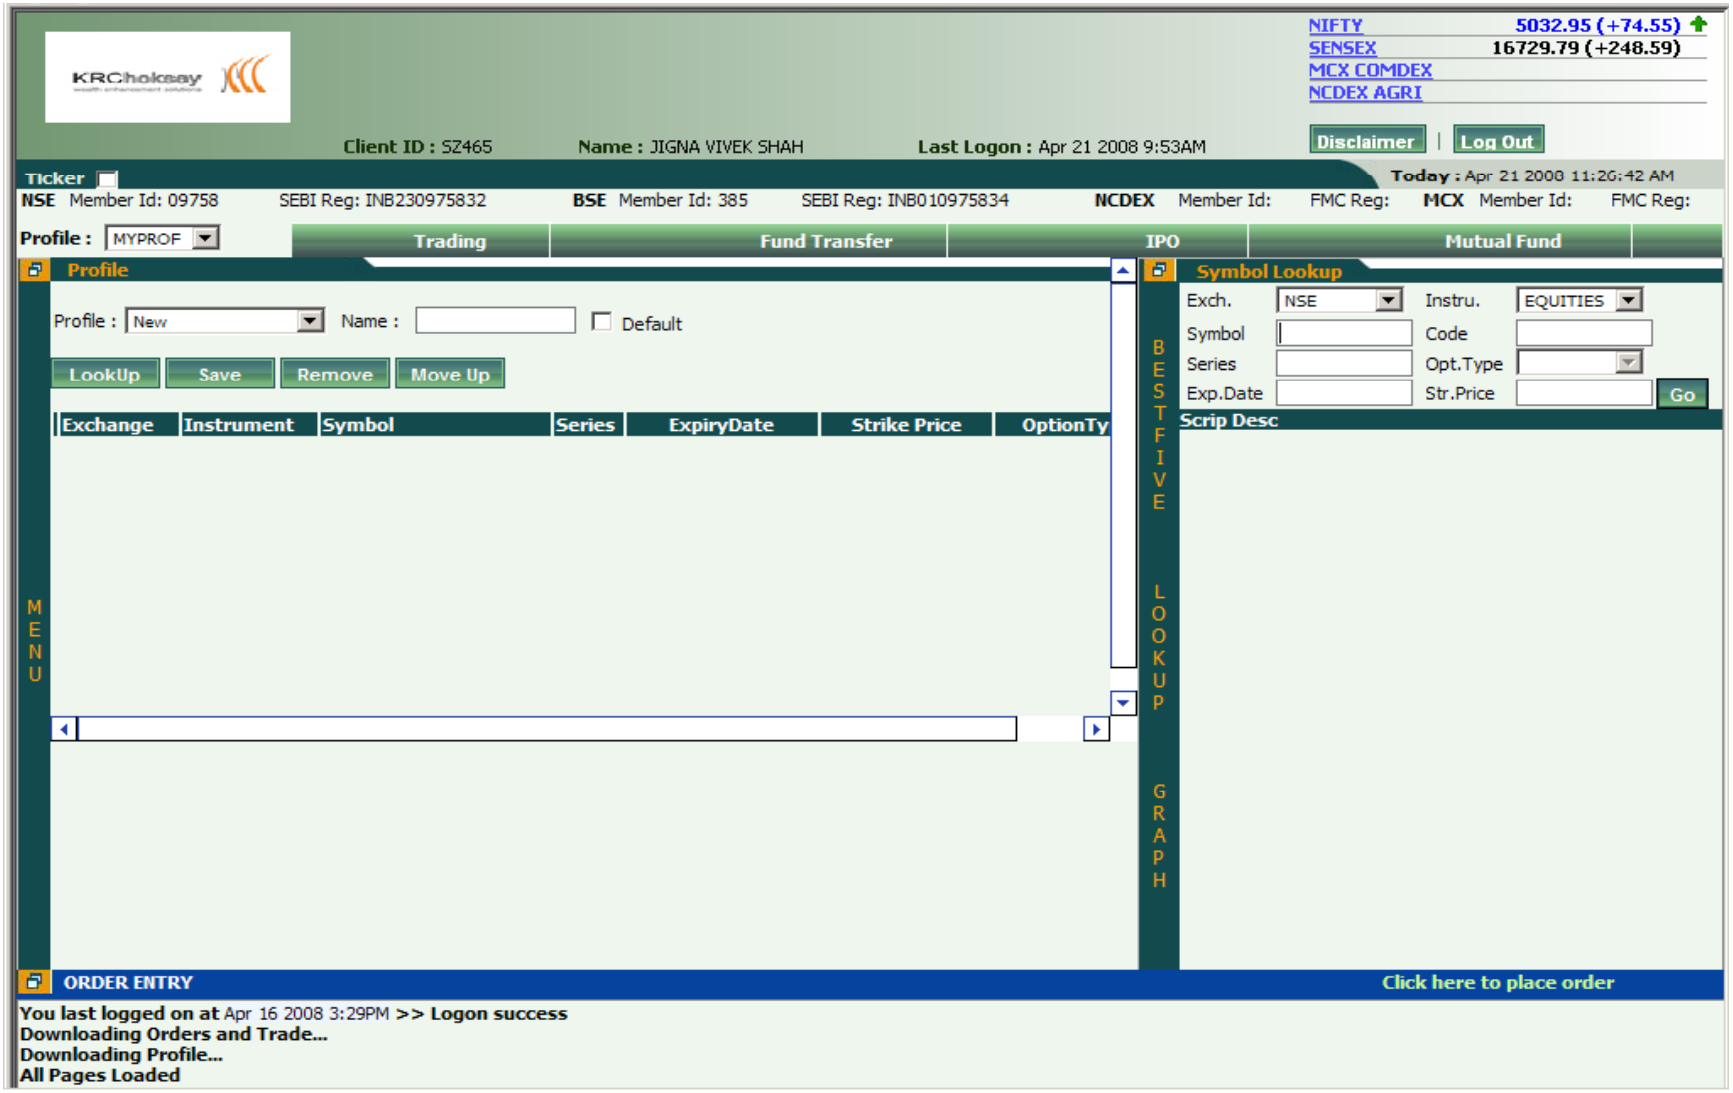
The Lookup button opens a new window as shown below where the user can select the scrip he/she wants to add to the market watch, there select the exchange i.e. NSE or BSE, enter the symbol name of the particular scrip e.g. REL for Reliance Energy Ltd and click **GO** or press **ENTER**. The scrip appears below, click the scrip you want to add in profile. After adding the required scrip in the profile click Save, the profile is created and it appears

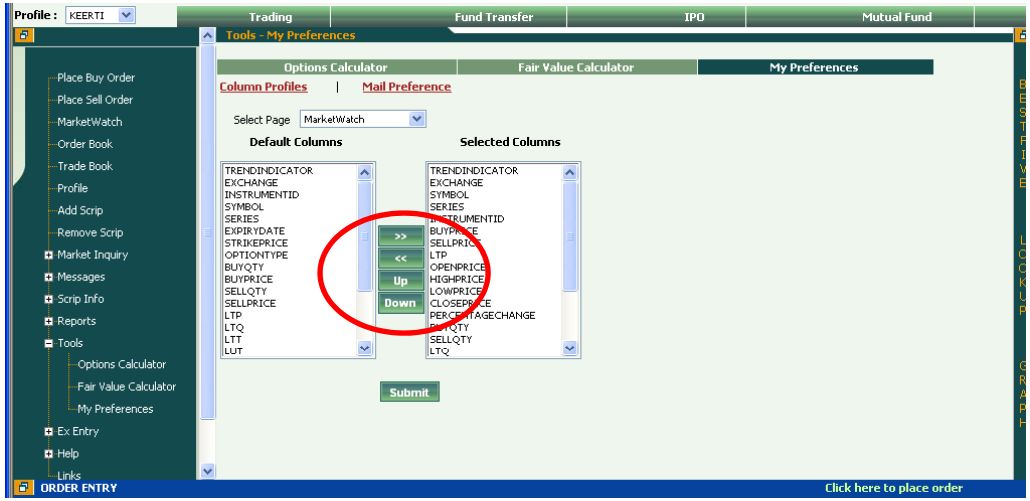


After opening look up part, user needs to minimize the menu part. So the lookup part will be highlighted fully for adding the scrip



Add / Delete Columns

The User can add more columns in a particular Market Watch or remove any columns from it. He/she can also choose the order of the columns by selecting the up and down arrow. The User Interface for this feature is shown below.



Click on Tools menu, then click my preferences and then change the order of columns or add/ remove columns as per your requirements by using up & down buttons and using the arrows and then click the Submit button.

- To come back to market watch click “Market watch” in Menu.
- The user can switch to the available profiles by clicking it from “Profile” scroll down menu.

Add Scrip

This button will allow the user to add scrip to the market watch group.

Delete Scrip

To delete the particular scrip, the user has to select the scrip to be deleted by clicking it in the market watch window and then Remove scrip option has to be clicked.

Place Order

This will explain the Features available in Order Entry option.

It includes…

- Limit Order
- Market Order
- Stop Loss Order

- **Limit orders** can be placed by selecting the order type as RL under NSE, NFO and LIMIT under BSE. The user has to specify the basic parameters like Symbol, Total Qty, and Price. Market Order

- **Market orders** are the orders whose price is not given by the user but it is taken from the last trade price of that script in the market watch. Market orders can be placed by selecting the MRKT option under the BSE and RL option under NSE, NFO exchanges. User is required to give the parameters like Symbol, and Total Qty. Price should be entered as 0. While sending the order request price will be taken as the last traded price of that particular script.

- **Stop loss orders** can be placed by select the Order Type as SL under all of the exchanges. For These kinds of orders user is required to specify the Trigger price along with the usual parameters Like Symbol, Total Qty and Price.

Note: For Buy SL orders the Trigger price should be less than the order price and for Sell SL Orders it should be greater than the order price.

Buy Order/ Sell order

To place buy order or Sell order the user has to select the scrip on which he/she wants to place order, then click place buy order or sell order option in the Menu, the order entry window appears below market watch. The user has to specify the basic parameters like symbol, total Qty, exchange, order type and price. Then the submit button has to be clicked.
